HISTORY OF OIL OR GAS WELL

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.

After drilling to 5637 and cementing 5-1/2" casing, top of cement plug was found to be at 5595. (PSTD). Perforated 5-1/2" casing from 5514 to 5524 and 5550 to 5580' with 4 jets per foot. Acidized with 500 gallons mud acid and 8000 gallons regular acid. Squeezed perforations (5514 to 5524 and 5550 to 5580) with 100 sacks cement. Drilled out cement and perforated from 5514 to 5524 with 4 jets per foot and treated with 500 gallons mud acid. Squeezed perforations from 5514 to 5524 with 50 sacks cement. Drilled cement and perforated from 5420 to 5432, 5442 to 5458 and 5472 to 5484 with 4 jets per foot. Acidized with 500 gallons mud acid and 2000 gallons regular acid. After swabbing well flowed 291 barrels of 41.2° gravity oil through 1" choke in 14 hours.

Pull rods and tubing and perforate 5 1/2" casing from 5375' to 5379' with 8 jet shots and from 5383' to 5395' with 12 jet shots. Run tubing with retrievable bridge plug and packer. Set bridge plug at 5410' and packer at 5340'. Acidize perforations from 5375' to 5395' with 500 gallons of NELST acid and follow with 1500 gallons of retarded acid. Pull tubing with packer and bridge plug. Rerun tubing and rods and return well to pumping.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Reason for remedial work was to increase oil production by perforating additional pay in Desert Creek Formation and acidizing all perforations.

Moved in pulling unit and commenced workover on 11/28/66. Perforated 5-½" casing from 5458' to 5466' with 2 jet shots per foot. Plugged back total depth 5493', unable to perforate from 5492' to 5496' as proposed. Set packer at 5410' and treated perforations 5420' to 5432', 5442' to 5466' and 5472' to 5484' in three stages with a total of 4500 gallons of 28% NE-HCL acid, 9000 gallons of NE treated water and 500 gallons of flaked naphthalene. Treating pressure first stage, 1400 psi with an average injection rate of 12½ barrels per minute. Treating pressure, second stage, 2000 psi with an average injection rate of 6 barrels per minute. Treating pressure, third stage, 1800 psi with an average injection rate of 5½ barrels per minute. Instant shut-in pressure 1200 psi, five minute shut-in pressure vacuum. On 24 hour test ending 12/8/66, well pumped 76 barrels of 40.3° gravity oil and 30 barrels of water. Length of pump stroke 100" with 10 strokes per minute.

Gentlemen:

This is to advise that as a part of a reorganization of Texaco Inc., a Delaware corporation, the name of Texaco Producing Inc., a Delaware corporation and wholly owned subsidiary of Texaco Inc., has been changed to Texaco Exploration and Production Inc. Further, Texaco Exploration and Production Inc. will succeed to the rights, titles, interests and obligations of Texaco Inc.

This means that Texaco Exploration and Production Inc. will be the operator for all the oil and gas properties that were operated by Texaco Inc. and Texaco Producing Inc. We plan to abbreviate the name as Texaco E & P Inc. for purposes of submitting production reports, etc., via computer, and we suggest that for consistency you use that abbreviation also.

We have enclosed a Sundry Notice with a list of the wells which Texaco operates in Utah. Also attached is UIC Form 5 for transfer of injection authority. Please note that Texaco has two Divisions which operate wells in Utah. One is located in Denver, Colorado, and the other is in Midland, Texas. We have enclosed separate Sundry Notices and lists of wells for each Division. If you have questions concerning the Denver-operated wells, please call Roger Hadley at (303) 793-4833. If you have questions concerning the Midland-operated wells, please call Ken Miller at (915) 688-4834.

Please change any of your other records as necessary to reflect this change.

DIVISION OF
OIL, GAS AND MINING

Dear Mr. Baza:

As you may recall from our meeting last year, we planned to combine the assets of Chevron U.S.A. Inc. ("CUSA"), by merger, and Texaco Exploration and Production Inc. ("TEPI"), by assignment, into a new entity which we referred to as "Newco LP". Along the way, additional information came to light and it was decided that this proposed corporate restructure would not be preferable. Therefore, CUSA and TEPI have continued to operate as separate entities.

We are now planning a simpler restructuring process where TEPI will assign most of its assets/operatorship to CUSA effective May 1, 2002. We plan to use the existing CUSA bonds/letters of credit, operator identification numbers, etc., for the TEPI assets that will be assigned.

A task force of Land, Regulatory and Environmental Compliance personnel are finishing the work that was begun last year to assign TEPI's assets—using the same forms and procedures as before. We have "new faces" in this task force due to reassignments and departures. In some cases, it may be worthwhile to visit you and your staff in person where new people are involved or if we need to review/clarify your forms and procedures. Otherwise, we will endeavor to complete the work to assign TEPI's assets/operatorship to CUSA and deliver the requisite materials to you in a timely manner.

During discussions last year, our focus was on Land, Regulatory and Environmental matters. The Finance organization also desires to join in this effort. For State Tax, Royalty and Regulatory reporting purposes (applicable to production from May 2002 through December 2002), we intend to generate two reports and two payments.

However, the reporting company name and identification number will be CUSA's. Beginning with January 2003 production and thereafter, we will issue only one CUSA report and payment. We trust this plan meets with your approval. Any questions or comments should be directed to Rick Dunlavy (telephone 713/752-7411, rickdunlavy@chevrontexaco.com).

We appreciate the cooperation and guidance you provided us in the past, and we look forward to bringing these efforts to a conclusion.

Respectfully submitted,
